

I STRONGLY SUPPORT THE REJECTION OF NAB'S PETITION 04-160

As you have largely regulated and abused normal FM and AM radio, I was forced to switch to satellite radio. I have been an XM subscriber for about 4 months now, and will never go back to the FCC regulated FM or AM radio.

I strongly disagree with any movement the FCC/government agencies or private lobbyists groups use to combat the new found freedom of satellite radio. Control of anything from Traffic and Weather to music to talk is up to the satellite listener, NOT A BUNCH OF WASHINGTON POLITICIANS. We are a country faced with serious issues, and this is not one of them. You are provided your jobs by the people of this country, if you want to keep them I suggest you do something other than attempt to control one of the last truly free sources of information that exist in this country today.
